The Colorado State Forest Service Nursery was established in 1957 and operates as a self funded enterprise within the umbrella of the Colorado State Forest Service and the Warner College of Natural Resources. We produce low cost, seedlings for conservation efforts, and proudly serve the Fort Collins, Colorado area directly from the nursery.

If you do not live in the Fort Collins area, but are interested in obtaining any of the seedlings we produce, we encourage you to contact a cooperating agency near you. These cooperating agencies, which are comprised of Colorado State Forest Service District Offices, University Extension offices, and Natural Resource Conservation District offices, accept tree orders, and receive deliveries from the nursery each spring.

In addition to providing a more local point for customers to pick up seedlings, these agencies can offer insight into which plant species will work well in the area they serve. Many also offer additional services which can be of great value for anyone interested in improving their land. For more information, or to find a cooperator in your area, please check online at:
